RE: DOCKET # 99P-4613

DEAR LYLE,

I UNDERSTAND THAT THE SAFETY TESTS DONE ON "POSILAC"  
WERE DONE ON HORMONES THAT CONTAINED AMINO-ACID  
SEQUENCES STRUCTURALLY DIFFERENT FROM THE PRODUCT  
MONSANTO NOW MARKETS. IS THIS TRUE, AND IF IT IS,  
DOES THAT CAUSE ANY CONCERN ABOUT ITS SAFETY?

PLEASE LET ME KNOW ABOUT THE CURRENT STATUS OF THE  
ABOVE MENTIONED SUBJECT. FDA'S RESPONSIBILITY IS  
FOR PUBLIC FOOD SAFETY — NOT FOLLOWING BIG MONEY'S  
DESIRES.

A PRODUCT NOT PROVEN 100% SAFE SHOULD NOT BE ON THE  
MARKET. TOO MANY INNOCENT LIVES INVOLVED.

THANK YOU FOR YOUR ANTICIPATED RESPONSE.

SINCERELY,

Jan Siegmann  
C 13
